a history of the world in 100 objects Updated Version

a history of the world in 100 objects is a compelling concept that captures the imagination by illustrating how artifacts can tell the story of human civilization. This approach, popularized by the British Museum's groundbreaking exhibition and accompanying book, demonstrates that the story of humanity is not just written in texts or grand monuments but also etched in the everyday objects we have created, used, and preserved over millennia. Each object serves as a tangible link to a specific period, culture, or event, offering insights into technological advances, social structures, beliefs, and interactions across time. By examining a curated selection of 100 objects, we can trace the evolution of human society from prehistory to the modern age, gaining a deeper understanding of the shared threads that connect us all.
